Finn Schoenmakers

Game Design Student · Level Design & 3D Art

Venlo, Netherlands fischoenmakers@gmail.com finnschoenmakers-gamedesign.com LinkedIn

PROFILE

I study Game Design at Fontys University of Applied Sciences. I enjoy coming up with ideas for games and figuring out how different parts can work together to make games fun and enjoyable for players. Right now, I'm most interested in level design, 3D art, and creating environments. I like mixing creative ideas with practical problem-solving, and I build projects in Unreal Engine both on my own and with a team.

PROJECTS

Sublevel

Team game | Level design, environment blockout, lighting | Unreal Engine 5.6

Worked on level design and the environment, developing both through blockouts in Unreal Engine.

Project Splitstar

Team game | Level design, environment, visual effects | Unreal Engine 5.6

Worked on level design, environments, and weapon effects for a 2.5D shooter. Planned rooms to introduce controls and build up combat challenges.

Target Shooter

Solo game jam project | Aiming minigame | Unreal Engine 5.6

Made a one-week aiming minigame, building the shooting mechanics and moving target behavior.

WORK EXPERIENCE

Climbing Instructor and Rescue Team Member | Fun Forest Venlo

November 2022–Present

Started as an intern in November 2022 and joined the staff in spring 2023. Currently work as a climbing instructor and rescue-team member.

CORE SKILLS

Level design: Blockouts, environment design, polishing

3D art: Modeling, Blender

Game engines: Unreal Engine 5.6, Unity

EDUCATION

Fontys University of Applied Sciences | ICT, Game Design

2024–2028 (expected)

Yuverta | MBO 4, Bos- en Natuurbeheer

2021–2024
